Forecast for Sunday 30 Apr 2023

Weather: A cloudy morning with rain spreading east, heavy at times. Rain may be persistent at times across some western hills giving extensive hill fog. Cloud breaks from late morning to give some drier, perhaps brighter intervals, but also heavy slow-moving showers. The odd rumble of thunder cannot be ruled out. Showers easing during the evening.

Chance of cloud-free hill tops above 600m: 10%, but increasing to 30% in afternoon. Best chances in east.

Low Cloud and visibility: Widespread cloud obscuring most tops above around 400m, perhaps affecting lower slopes in the west. Bases lifting around 800m to give some breaks during the afternoon, especially across eastern Dales. Cloud bases lowering again in any showers. Moderate to poor visibility in rain and showers, good in any dry, and bright spells.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A rather dull and wet morning with outbreaks of rain. Waterproofs may become soaked for a while and watercourses may become swollen, particularly where showers become slow-moving.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 30 Apr 2023	0mm	0.4mm	2.2mm

Forecast for Monday 01 May 2023

Weather: Fairly cloudy overnight with occasional bursts of rain or drizzle possible. Some mist and fog patches forming were skies clearer in the early hours, clearing mid-morning. Some brighter spells possible for a time around noon, before cloud thickens again from the north, perhaps bringing late rain. Turning chilly, especially on the tops.

Maximum wind: West to northwest 15-20mph gusting 30mph at times. Easing North 10-15mph later.

Chance of cloud-free hill tops above 600m: 40% during the morning, increasing to 70% during the afternoon. Falling to 30% from the northwest later.

Low Cloud and visibility: Occasional cloud obscuring routes above 500m during the morning, perhaps down to lower levels on western slopes. Cloud thickening, and perhaps lowering to 300-400m, later in the afternoon, mainly in the north. Good to very good visibility away from cloud, but moderate in showers and poor in any drizzly outbreaks.

Temperature: **Valleys:** Plus 6 Celsius rising to Plus 14 Celsius
At 600m: Plus 5 Celsius rising to Plus 9 Celsius, falling to Plus 3 Celsius after dark.
Freezing level: Above the summits, falling to around 900m overnight.
